

Oxfordshire

At Newmedica, we have some of the UK's leading consultant ophthalmologists who specialise in the treatment of advanced eye conditions. Our surgical centres are owned and led by the consultants, who hand pick their teams to ensure the right care is provided.

How to refer to us

For NHS referrals within Buckinghamshire, Oxfordshire and Berkshire West:

Opticians

For cataracts only: When the referral has been uploaded to Rego, the patient will then receive a call from Ufonia to offer choice. This will be based on distance to the patient and they will get two choices with further options available.

All other services: Refer directly via Rego.

Opticians outside of this area

Email us at newmedica.oxfordshire@nhs.net stating the patient would like to be seen by Newmedica Oxfordshire.

GPs

We're listed as NEWMEDICA – OXFORDSHIRE on the NHS e-referral service.

Private patients

Email us at newmedica.oxfordshire@nhs.net – please include referral form/letter and current refraction.

Services we offer

We offer NHS and private services.

- Cataract Surgery
- General ophthalmology (private only)
- Glaucoma (private only)
- Oculoplastic
- VR Surgery (private only)
- Wet AMD (private only)
- YAG Laser

Why choose Newmedica?

Better clinical outcomes

Surgical complication rates are significantly below the norm, with posterior capsular rupture (PCR) at 0.31% compared to the national benchmark of 1.1%, so you can rest assured your patients will receive the best care.

Higher quality intraocular lenses

We are one of the only providers using the highest-quality monofocal intraocular lenses for NHS patients, with the lowest posterior capsule opacification (PCO) rate on the market. That means less YAG laser capsulotomy, fewer patients going through the worry of avoidable treatment, and savings for the NHS.

Short waiting times

Our short waiting times mean your patients will have their first appointment within a couple of weeks.

Why choose Newmedica?

Continuity of care delivering 99% satisfaction

Our consultant ophthalmologists and their experienced teams are a consistent presence in our surgical centres so you, and your patients, get to know the team they can trust.

Free transport and reassurance when it's needed most

We take the time to get to know your patients, offer to hold their hand or play their preferred

music in theatre, and provide free transport for those who need it.

Broader ophthalmology services to meet more of your patients' needs

Our consultant ophthalmologists specialise in treating a wide range of eye conditions for the NHS and privately, including glaucoma, YAG and VR. That means the same familiar faces for you and your patients, and it often means more complex patients can also benefit from our services.

Our consultants

Melanie Chak

I specialise in oculoplastics, small incision cataract surgery and more.

Markus Groppe

I specialise in cataract surgery, age-related macular degeneration and more.

Moustafa Issa

I specialise in medical retina and cataract surgery and more.
